SCRAMBLE ALL YOUR GREY BITS

Apply for the brain transplant today.

Or take your chance in the queue with all the other players about to gamble their sanity with EA's latest MegaDrive releases.

Starting with "Blockout" TM, the fastest, looniest, most exasperating 3D strategy puzzle game, that would send Einstein crying all the way back to his kindergarten.

Or "Centurion"™, when it's just you against the known world. Luckily it takes place in Roman times, when most of the world was completely unknown. However you still have to take on the Gauls and Barbarians, not to mention what's supposed to be your own side - on sea, land and the chariot field.

In "The Faery Tale Adventure" The being one human being against the Evil Necromancer, isn't nearly enough. So you get to be three whole brothers, fighting multiple enemies in real-time combat.

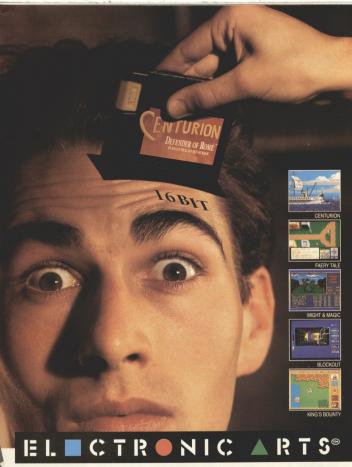

With "Might & Magic - Gates to another world", you're now eight role-playing characters, scheming your way past 96 spells on a 100 "hard-core" missions to save the World of Cron.

Finally in "King's Bounty" Nou're back to being one person again. But you do have four continents to cross and hundreds of battles to wage against 25 villainous fantasy creatures, before you can claim the Sceptre of Order.

Try them out today and take a fitting for the straight-jacket at the same time.

SE SE

After the fightin' in' fumpin' excellence of Streets of Rage, Sfreet Smart brings you down to Earth with a bump. It's a very poor fighting gaine, with the player taking on a series of bad guys one after the other. The difficulty level is 1-ow and most players should be able to complete the game within a few hours. The graphics are pretty poor and the sound is worse - if you're after beat' em up action, check out Streets of Rage and steen will clear of this

STOP PRESS!

Six new Megadrive titles arrived has the office a few hours before Weddat (###) to press, and we just managed to grab a few pictures to bring you this so-hot-off-the-laser-printer-it's-burning report.

This split-screen two-player conversion of the Namoo 4-Trax quad bike racing coin-op had plenty of promise, but fails to live up it its potential. Again, playability is at a fault, with the quad bikes handling very unrealistically. Just to make things worse, the graphics and sound aren't that hot either. What a shame.

VAPOUR TRAIL

Sega's most famous racing game has finally hit the Megadrive. It looks a pretty good conversion, but Jaz finished it on his first go, and then proceeded to go through it twice again within minutes. The graphics are good and the sound is alright, but the lack of challenge means that only novice racers or Robin Reliant drivers will get any value for money out of it.

to appear on the Megadrive. The graphics are a hit fuzzy but it's guite a jolly game, with different tables and sub-screens to battle through. First impressions are lairly favourable, but once again its long-term challenge is questionable due to the rather low

Here at MEAN MACHINES we are committed to giving you the most in-depth console reviews. Here's how they work.

GAME DIFFICULTY: This tells you how easy or tough the game is. If you're a novice player, easy games should keep you happy. If you're a veleran joystick-jockey medium or hard games are recommended

LIVES: Talls you how many times can you die and still return from the grave.

CONTINUES: Tells you how often you can restart from where you died. Beware: too many continues can allow

you to finish the game too quickly, and seriously damage your enjoyment. SKILL LEVELS: Many games let you fix the difficulty

level for yourself, so you can increase the challenge if you get good at it. This tells you how many skill levels there are RESPONSIVENESS: Is it humanly possible to avoid that

mutant's death-beam, or does the joystick refuse to obey your frantic commands? This section lets you know! PRESENTATION: This is an important part of any game.

Are the instructions clear (and in English)? Do the option screens make sense and look pretty? Is the screen well laid out? Is there plenty of in-game info? This rating tells you all.

GRAPHICS: This includes not only the quality of the sprites and their animation, but the backgrounds as well. Graphics are judged not only on their prettiness, but on how well they are suited to the game. SOUND: The difference between a booming, catchy intro

tune and a few weak bleeps that sound like a dving Spectrum is indicated here. Music and effects can make a big difference to a game, so don't ignore this factor. PLAYABILITY: Some games you just can't stop playing,

no matter how late at night it is. This measures the addictiveness of the game, and how much you'll think about it - even when you're not playing it!

LASTABILITY: You don't want to spend your cash on something that will only last a week. Check this box out to judge if you are going to be playing it in a month, or he hored with it within a week

OVERALL: This is it. This mark takes into account all the above ratings and acts as a quide to the game's overall quality. If a game scores over 90%, it's a Megagame and is well worth buying!

LAYERS: Simply tells you how many players can play the game - either simultaneously, or one after the other.

A MEAN MACHINES MEGAGAME! A completely superh same which chouldn't be missed 90.00 A very very good game which just misses out on the

Megagame award due to minor deficiencies. Definitely 66-70 A pretty good game which should still appeal to fans of

the genre.

45-64 An average game - might disappoint some fans. 20.44 Below average. Very few players will get much entertainment.

11.29 A very poor game indeed which will only be played a few times before being shelved. 4.4

An utterly ghastly travesty which should be avoided at all costs.

MEGAGAME When you see this on a review, it means that the game has gained the highest award MEAN

MACHINES can bestow. And if the game is for your machine. you better start saving for it now!

CLASSIC

This is given to a golden oldie which MEAN MACHINES decides to review. Although the game has been out for a while, if you haven't got it in your collection. you're missing out.

SWITCH ON TO ROAD RASH

OR EA HOCKEY AND YOU'LL GET

MEGA ACTION ON THE BRAIN

Hold on to your consoles!

And get ready for the roughest, toughest and fastest games yet.

In EA Hockey, from the team that brought you John Madden American Football™, you get no points for being nice. So body-check, punch, slash and trip the opposition into submission. Get the puck into the back of the net or between the goalie's eyes, it's all part of the fun.

Should you find the rules an unnecessary hindrance, send the referees off to the sin bin and create even more havoc without them.

Rules won't worry you at all in Road Rash, the wildest action on two wheels. There aren't any.

There is a race. Across 5 highways from the Sierra Nevadas to the Pacific coast. But it's your skill in kicking, punching and clubbing all-comers out of your road that really counts.

As a bonus, if you get to cross the finishing line first and more or less in one piece, win cash and upgrade your bike to an even more ludicrously fast machine.

Road Rash and EA Hockey are just two of the newest exciting games for your Mega Drive™. Also available soon from Electronic Arts are:

Starflight[™], Fatal Rewind[™], Shadow of the Beast[™], The Immortal[™] and Dark Castle[™].

But as time passes the enemy move ever nearer, so part of the UN Squadron's job involves protecting the last base from enemy attack. Beasting some of the most spectacular scrolling ever seen in a console game, the dive-bombing section is a small bound sub-level that enables out heroes to gain a little extra cash. At the bottom of a dangerous canyon lies a mobile enemy base. Blast this into oblivion before the time limit expires and loads o' dough is yours for the taking!

SAKI'S STRATEGY SECTION

Missions can be selected at will, provided they're within the boundaries of the illuminated part of the map. The illuminated part of the map. The illuminated are only gets larger once all of the enemy forces in the area have been annihilated. At the far right of the map lies the enemy base. Blast this into oblivion and you're a hero!

voti. 3) - 2005 - mini PPISITIO MERIC ALS

The defense spending cuts really cause our heroes some aggro in this game. The only way to get some cash to purchase hi-tech weapons is to blast all enemy artillery painted red. This releases a red icon that endows the player with some more cash. The shop is mission. The range of weaponry is to vast to list here but includes the likes of massive three-way lasers, Gatling guns, and energy

COMMENT

The excitement level generated by Super R-Type was enough to have most people running for a change of underwear, but UN Squadron (or Area 88 as those funky Japs calls it) is better still. It's got better

graphics (and very artistic they are too), it hardly slows down at all, it's bigger, and it's very tough to master! The game's difficulty level is pitched at just the right level.

Things start off pretty simple but by the time you reach level four, the sheer amount of enemy hardware out to blast you really makes things difficult. UN Squadron simply oozes polish, from the excellent intro to the massive explosion of the last end-of-level boss. If it comes to a toss-up between this and R-Type, UN Squadron comes out tops every time. But if you're a really flush (or indeed, flash) geezer, get 'em both for the

best console blasts available in the omniverse!

There are three heroes selectable at the beginning of the game. Shin Kazama is the token female of the squadron. Though her power-up abilities are limited, she's the fastest fiyer. Greg Gates prefer a more powerful ship at the expanse of speed. Mickey Simon is the last member of the squad. Both his power-up capabilities and speed are average.

This stealth bomber has many deadly weapons up its capacious sleeves. AEROPLANE ANTICS

Using some of the cash gleaned from each level, it's opssible to completely new aeroplanes! Each new 'plane is more maneouvrable than its predecessor and can erry more special weapons at once. Also worth noting is that each ship can use more power-ups, thus increasing your destructive protential!

On the night sky level, massive enemy carriers arrive to offload some nasty missiles in your general direction. Keep those eyes peeled!

The bog standard ship. Not that nippy and it's crippled by a low power-up capability.

carrying an even more lethal range of weapons than the POWER 5 ships, the A10A is very powerful indeed and carries downward-firing missiles on board as standard.

F20 TIGER SHARK POWER LEVEL: 5

The F20 has the same power-up level as the Crusader, but has greater speed and uses different special weapons.

More special weapons can be crammed onto F14D than any of the other POWER 5 ships. It's also a bit faster too.

Another POWER 6 ship, the Stealih Ray has slightly inferior firepower than the A10A Thunderbolt, but its stealth abilities enable it to completely fox any kind of homing missile!

Another ship with stealth abilities, the F-200 is capable of carrying every single special weapon available to the UN Squadron! It's the nipplest ship there is, and is the only POWER 7 ship in the whole game!

tough, tough JULIAN tough, tough Squadron (or Area 88 as it's known in Japan) is one of the best blasters available on any system It's not a true arcade conversion: instead it incorporates levels from the coin-op and adds a whole load of new features, making this a much bigger and more varied game. The graphics really are stupendous, with beautifully drawn backdrops and perfectly detailed sprites - check out the screenshots and see what I mean. What you can't see. though, is how it plays. But take it from me, this is a fast and hard game. The action is frantic. and much dodging and weaving is required to battle through the levels. The difficulty level is nicely balanced, and the action completely addictive, keeping you playing and playing until your trigger finger aches. I've already said that Super R-Type is a must for your Super Famicom. This is even more of a

Mega explosive effects and decent tunes spruce up the atmosphere.

The shoot 'em up action is addictive from the word go.

Even completing the game on easy level takes some doing!

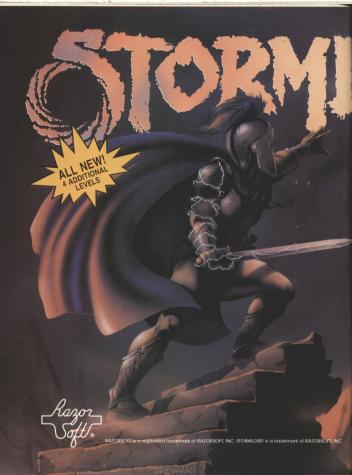

The best shoot 'em up on the Super Famicom. Even better than the coin-op original!

UN SQUADRON: THE COIN-OP

The basic gameplay of this Capcom arcade conversion is much the same as the coin-on However, the strategy screen was not evident in the arcade machine and each character only had one ship to fly during the game. Some of the level geography has also been altered in this Famicom game. Arcadesters will know that the follow-up to UN Squadron, Carrier Airwing, is also out and about in the arcades. This features the same basic gameplay but had far superior graphics.

DEATH DEEVING LIAR

Dear YOB

Today I went to my local newsagent to buy a copy of MEAN MACHINES but the usual five minute walk was a hazardous one

and immediately fell down the three steps which lead up to the door. I landed awkwardly on face - breaking my nose. Since I had to get to the shop fast before the magazine sold out, I got up to continue my walk.

I must have walked a full five yards before I needed to cross a

nall one-way road which about three cars use in a day I crossed without looking and guess what happened? I was knocked down by an OAP driving a Reliant Robin. The collision had broken my left arm in two places, fractured my skull and given me a sprained ankle, but I knew how important it

was to get to the shop quickly, so I continued to walk, or hobble Upon rounding the corner I was

approached by an unsavoury gang of hooligans who took great pleasure in hacking off my right arm with Stanley knives - what a

amin will fun day!
By this time I thought that nothing else could go wrong, but how wrong I was! I had finally reached the shop's door (which I had not had no As I limped towards the magazine shelves I tripped over a crate of milk (smashing every bottle) which sent me flying at a high velocity in the direction of the cooked meats display. My head went through the glass (which the shop owner made me pay for) severing my nose, right ear and gouging out my left

I slurred out the words "Can I have a MEAN MACHINES please?". I was given a copy and

DELUDED MAN OF THE MONTH

Dear big ass YOB, You are talking out of your ass. The Amiga is 5000 times better than the stupid Super Famicom, you dozy ass. When this boy called Glen Paul in Scotland said it in the graphics but the playability you said it was completely and utterly true. You've said that 7348 times, You're talking out of your butt. fact that the Super Famicom also has 28,000 colours more than the Amiga is an additional bonus. The Super Famicom also has better sound too - another additional bonus. Face up to the facts baboon-boy: as a games machines, your Amiga is nowhere near as good as a Super Famicom.

DEKE'S VOICE OF REASON

Dear MEAN.

Dear MEAN, Interesting fashion statement there m'man. The hair, the jacket, the boots, the kecks, the chin... A lesser man might have looked a right dickhead in that little lot.

To business. You seem to get an awful lot of letters along the lines of "What's best? The Verbifletcher or the Kray 9000?" or "My mate's a complete twat. He reckons his Oric is better than my Unix 2 step. Please put him

I still play Intellivision games 'cos that machine still happens to have a lot of games that appeal to me. Likewise, because I'm a space shoot 'em up fan I've bought a Megadrive. I know the SNES is a superior machine, but from my own personal point of view it doesn't have superior software. What's the point of having the best machines if someone else has the

waste, but what else are we supposed to do with them?

USE YOUR BRAIN

Dear MEAN YOB. I am a very puzzled boy. This Christmas (or sooner), I am about to buy a mountain bike. But recently I came across the Super Famicom, Lam confused, Should I get the bike or the Famicom? I own a Master System and my games include Mickey Mouse Ghouls 'n' Ghosts and Kung Fu Kid. I don't have many games because I want something with a lot more whoosh! My friends tease your advice. Famicom or bike? Trevor (funky guy) Armistead, Stratford, Manchester YOB: Well, you can't ride a Super Famicom to school, and games cartridges don't fit in a bike. Decide whether you want to ride around or play games and come to your own conclusion, you plonker.

Apparently the orange guy is the artist - Mark Mangel from London!

A QUART OF **TROUBLE**

Dear MEAN YOB,

Me and my friend Andrew have got a Nintendo, but two others of my friends have a Sega. They are called Mark and Chris. One of them said that the Sega has better them said that the sega has onter graphics, better and more games, better control pad and Sonic the Hedgehog is better than Mario (fancy that from the friend I always play withl). There is another friend of mine and his name is Danny. The only reason he come over is to play on my Mirtendo. What cheek! I can't stop him because If I have he will be the friends with say no, he will break friends wit me! He's a sod! He always makes up names that are completel ade up! DIY JOYSTICK ACTION

Dear YOB. Being a keen MEAN MACHINES reader. I thought you might be interested in my NES arcade game which I constructed in my bedroom of all places. It took me three weeks or near enough and a hell of a lot of patience. The hardest part was converting Spectrum joysticks to work with my NES ecause apparently you can't get an actual joystick that is Nintend

compatible.

My NES sits in the bottom of the machine along with the cartridges, as you can see by the photos I have enclosed. It can als be used as a television and plays ust like the real thing David Johnson, Edgbaston,

Aaaaiiieeee! Get vour sunglasses on 'cos here comes Jazza in his very brightest pair of special answering trousers. Yes, vou've quessed it! It's Q+A time, when all your questions get answered by Jazza, the man with the world's greatest console knowledge. If you've got any questions on any subject and you need them answering quick (and we're sure you have), send them in to SIARAD I FI JAZZA, Q+A. MEAN MACHINES. PRIORY COURT, 30-32 FARRINGDON LANE.

LONDON, EC1R 3AU. HERE'S A

Dear Jaz. Please could you answer my following questions. 1. When will the CD-ROM for the Megadrive be officially

released? 2 Will there be a Japanese one, a Genesis one and an English one, If so, would you need

3. How did you get such a high to buy an English one if you had an English Megadrive? 3. Is Fantasia graphically any

Ghosts, Super R-Type?

good? The screenshots I've seen it looks pretty poor. 4. When will Fantasia. Toe Jam

and Earl and Quackshot be out? Cheers then Paul Fowler, Staines, Middlesex JAZ: 1. Autumn next year is the current date. 2. As far as we can tell, there won't be any kind of compatibility problems, If we find out anything to the contrary, we'll let you know, 3. Fantasia is graphically good, but the playability is still being severely tweaked. Wait until you've seen the MEAN MACHINES review next month

before you buy. 5. All later on this year.

COMPLETELY FAB

Dear Jaz. I trust you know a lot about the SNES because I am going to send you a few SNES-related questions...

1. When, roughly, will the SNES be released in the UK (to the nearest month)

2. What percentage would you give these SNES games: Caveman Ninja, Super Ghouls 'n'

score on Super Mario World in issue 116 of CVG?

4. Is Super Mario World harder or longer-lasting than the games in question five?

5. Why are Megadrive platform games so easy? So far I've completed Sonic, Mickey Mouse, Super Shinobi, Ghouls 'n' Ghosts. Strider and ESWAT. Jonathon Arnold, Ringwood, Hants JAZ: 1. September 1992 2. Wait until we review them, then you'll be able to find out. 3. Skill, pure skill. And genius. 4. Yes. 5. Because Sega Japan seem to think that European gamers want easy games. We're currently trying to persuade them that they're completely wrong, and that they should

make their games a lot harder.

HEADLINE JOKE

Dear Jaz

would be grateful if you could answer these questions.

1. Is Turbo Outrun any good for the Megadrive? When can we expect a preview or review of it?

2. Any chance we will see any big name Sega coin-ops converted to the Super Famicom?

3. How long before you review Super Ghouls 'n' Ghosts on the Famicom, I can't wait to see it. Gareth Hector, Paisley, Scotland JAZ: 1. It's pretty good - expect reviews at Christmas, 2, What do you think? 3. Unless there's a delay, expect a review next month

SPECIAL. COURTESY

Yo Jazl What's your fave game at the

moment on the NES? What do you think of Duck Tales? Are you going to review Silver Surfer and Robin Hood: Prince of Thieves? Your number one screaming

David Chesters, Crewe JAZ: Nemesis II is my fave Nintendo game at the moment it's a completely brill blaster, but won't be out until later on next year! Duck Tails is a laugh. It's got great graphics and sound, but it's a bit too easy for my liking. We'll review the two games you mentioned if and when they're officially released

OF JAZZA'S SPECIAL

Dear Jaz. I've got some questions about the

Super Famicom, Please answer

1. Is it true that the PAL imported Super Famicom has crap quality graphics and sound?

2. Is the SCART Super Famicom any good in the graphics and sound department?

3. If the sound from my C64 (who laughed??) is distorted on my TV, will the Super Famicom's sound be distorted as well?

4. What sort of Super Famicom and monitor do MEAN MACHINES us?

5. Is Advance Console Entertainment's *Advance Colour Enhancement* mode any good? Please reply before I go start

raving mad! John "I'm not married to Roseanne Barr" Goodman, Stevenage JAZ: 1. Not necessarily, but they're incredibly unreliable, 2. It's the tops. 3. Not necessarily your C64 sound chip might be shagged out. 4. A SCART one with a Philips monitor. 5. Yeah.

LAUGHING TROUSERS.

MEAN MACHINES 30

HOW DO

Dear Jaz.

I am the proud owner of a Nintendo and I am shooping for a handheld games system. To help me choose between either a dazzling Gameboy or some more games for my NES, please answer these questions:

1. When the arcade Turtles comes out on the NES, will it be

any good? 2. Can the Gameboy run US, UK and Japanese cartridges?

3. How long do the Gameboy's batteries last?

4. Is it worth getting a Gameboy? 5. Can you make this star letter,

because I need the cash! Ben Roseff, Betlev JAZ: 1. Yes. 2. Yes. 3. Ages and ages. 4. Yes. 5. Get lost before I kick your monkey ass.

YOU TURN

Dear Jazza. I have a few questions for you to answer. Do you know if any of these games will be released on the Megadrive

The Secret of Monkey Island. 2. WWF Superstars.

3. Splatterhouse.

4. The Simpsons.

5. Operation Wolf. 6. Growl

7. Lords of Chaos. B. Kick Off 2.

9. Final Fight. 10. Dead Angle.

A DUCK

Chris Sadcer, Chesterfield JAZ: Oooo. You awkward bar steward. No. maybe, no. no. no. no and no, followed by two strong possibilities and rounded off with another resounding no.

git. Dear Jaz.

Since you're a "god-like genius" I thought you wouldn't mind answering my questions.

1. Which Gameboy games do you know of that use the four-player adaptor?

2. How likely are Gameboy Mario 2. Speedball/Klashball. Rainbow Islands, Bad Dudes, Turtles II coin-op conversion?

3. Good though Chessmaster is, why did you give it a rating better than Contra, Hunt for Red October, and Marioland (even

though you've said this is the best

game on the Gameboy?) 4. Why can't you have a Q+A

star letter? Martin Kimber, Keele

JAZ: 1. There's only one at the

moment, and that's the race game you get free with the adaptor. There are plenty of new ones in the pipeline - we'll be bringing you news about them

in the coming months. 2. Sequels to Mario and Turtles are

very likely - watch this space. The other two are virtual no-nos. 3. Because it's better than all of them - even Mario, 4, I answer your questions - what more do you ruddy want, you ungrateful

INTO A

Dear Jaz. I am writing to ask you a few questions about a game I am thinking of buying for my Gameboy.

1. Which is the best game out of Megaman, Robocop, The Simpsons and Gremlins 2? And why?

2. Are there any good beat 'em ups for the Gameboy apart from Double Dragon? 3. I have tried to find Mario 2 on

the Gameboy. Does it exist? Richard Kuczma, Sudbury, Suffolk JAZ: 1. I think the Simpsons is the best because I like it more than the other three, 2. Wait for Double Dragon 2 to appear and your question will be answered. 3. No, not yet.

SOUL SINGER?

Dear Jaz, I will be getting a Megadrive soon

but I am unsure of which version to 1. Are the imported Megadrives

which sell for around £100 any good, as I have heard that they aren't as good quality as the official ones (poor picture quality etc)?

2. Do they really run Japanese, American and UK carts and convert 95% of Japanese text? 3. As the guarantee offered by

importers lasts only a year is buying one safe? What are the chances of a breakdown after 12 months?

W Wild, North Water JAZ: 1. Imported Megadrives are generally just as good as the official ones - check 'em out

before you buy, 2, Some do check with your importer, 3. The same as an official machine which also has a 12-month quarantee.

STICK IT

Bonjour Jazza, I've mailed you some questions of which I am sure many people will be interested in knowing the answers to

1. Will Pro-Soccer be released on the Megadrive? 2. Will the arcade Ninja Turtles

appear on the Megadrive? 3. Will you be covering the CD Megadrive when it's released?

4. And while I remember what's your favourite game EVER? Whilst I am writing this letter, I am sat watching Little and Large.

and to be quite honest. Sid Little isn't particularly amusing. James Ward, Ravenshead, Nottingham JAZ: No, maybe and yes.

Stargate (the sequel to Defender) is my current all-time favouritest ever game ever in the whole world ever. By the way, I think that Little and Large are about as funny as having your haemorrhoids removed with a rusty chisel.

IN A Dear Jazon

In last month's issue (page 85) is an advertisement selling a machine called the GB300SE. So I rang up and asked what it was and I was told it was Nintendo compatible and took American cartridges. Please explain. Daniel, Dyton, Leeds JAZ: It's one of many Nintendo

clones produced in the Far East which run Nintendo software. They're pretty cheap, but build quality tends to be rather dodgy. You'd be better off buying a proper Nintendo and getting a specialist to convert it to run US software

MICROWAVE AND

I've just bought a Megadrive and I'd like to know a few things.

1. When is Speedball 2 coming 2. Are Streets of Rage and Golden Axe 2 any good?

31 MEAN MACHINES

best, get Hockey. If you like platform games best, get Hockey. If you like platform games best, get Sonic. You don't seem to be using you brain. Why? 2. Neither. Becauss 3. Yep. 4. Only if you've got a SCART machine. 5. We already did in issue 3 - you obviously missed it. Doh!

IT'S

Dear Jaz.

3. Have you reviewed Altered Beast, and if so, how much did it get?

Thanks for your time. Michael Sheaf, Abingdon JAZ: 1. Stateside release date is November, 2. Both are great, 3. No, and if you're interested, I think it's pretty hopeless.

WAIT UNTIL

Stables (BATTLETURD). 1. I've

1. When will Gameboy Pit-Fighter be out (on import) and

I have some questions to tax you

will it be any good?

2. I though Skate and Die (Bad and Rad) was great, so is the sequel better?

3. When Gameboy screenshots are in your mag they are red, blue, purple and black, but never the real colour, GREEN. Why?

4. Are there any home computers better than the Amiga because the BBC Archimedes is 32-bit?

Christopher Mansbridge,

Strathclyde JAZ: 1. I dunno. I haven't seen it

vet, 2, I didn't think it was quite so good. 3. It's a trick of the light which fools the camera. 4. There are loads of IBM PC Compatibles which stuff both the Amiga and Archie.

BILL WITHERS!!!

I am writing in disgust after reading your August issue (number 11) Q+A section, because some Dickhead called Matthew Smith blatantly put down Master System owners. There is NOTHING wrong with the Master System at all! Now

for some questions? 1. Are Master Systems technically superior to the NES?

2. What is a Graphics Tablet? 3. When will it be available for the Megadrive?

4. How much will it cost? 5. Will you be at the European Computer Entertainment Show at

Earls Court? Mervyn and Buster, Tonbridge, Kent

JAZ: 1. Not really. 2. It's a peripheral which, when run with specially-written software, lets you draw pictures on-screen. 3+4. I haven't got a clue, 5. No. 'cos it's cancelled!

HA, HO, HE. LAUGH YOU PHILISTINES.

Dear Jaz. I am hoping to get the Simpsons game for my Nintendo for my birthday and I would like to know if it is the same game I played in the amusement arcade on holiday, or are they all different? Alan Miller, Eastfield, Scotland JAZ: It's a different game to the coin-op, but I think it actually has longer-lasting appeal!

Check out the review elsewhere in the mag and see what you

think.

Hiya! Welcome to the best consoles tips section known in the four dimensions! We've got a vast mound of extra-special tips for all formats including a mega Spidey low-down AND some tips from Gaz himself on Gameboy Choplifter 2! If you reckon that you have anything new and exciting in the tips scene that we should know about, send it all in to MEAN MACHINES TIPS, Priory Court, 30-32 Farringdon Lane, London EC1R 3AU. Who knows? You could be on the receiving end of £150 worth of software for YOUR console. Not bad, eh?

CAPTAIN **SKYHAWK**

Ingemar Hjelmstad (yes, it's that man again) sent in a whole load of tips for this game. According to him, you can skip levels during play by pressing buttons A and B along with UP on the controller two. You'll automatically jump to

Mark Greene from Dublin sent in his method for finishing the Turtles game.

On the third level, there are two buildings. Inside these is a scroll weapon (these destroy everything). This scroll reappears if you leave the building and enter it again! Give each turtle lots of ecrolle

LEVEL THREE BOSS: Select your scroll weapons and keep firing them at the boss until he dies. A green man should then appear. Hit him and jump onto the ledge next to Splinter, then repeat your onslaught.

LEVEL FOUR BOSS: Select Donatello and get him to stand between Mouser's legs. When he opens his mouth, press fire and up. After a few good hits, he bites the proverbial dust.

LEVEL FIVE BOSS: Stand at

the next mission! Also, if you fancy the prospect of playing this topper game with decent weapons and nine lives, follow this plan of

701 001 action. After you press START, wait until the words CAPTAIN SKYHAWK come up again. At this point, press DOWN and button A. Now you'll start with nine men and all the weapons!

When you reach the last stage in Dr Wilv's castle (the one that has acid dripping from the roof). keep to the very right of the screen at all times and you avoid the drips of acid! Simplicity itself courtesy of Peter Lindsay from Glasgow.

NINTENDO

Lloyd Phillips from Bury sent in these tips for dealing with the end-of-level guardians

BARBARIAN: Throw your small skuriken star at him, then close in for the kill with your sword

KELBEROSS: Get under the left podium and hit him with your windmill star when he comes from the right. Staying on the left, hit the other one with your

sword or star BASEQUR: Use your windmill star and throw it at

his bullets. When it returns to you, jump over it and it

throwing your small star without stopping. When you run out, get him with your sword.

JAQUIO: Use the art of fire wheel, and shoot him once. Run to the right and shoot him once. Run to the right and shoot him once. Repeat this process to make Jaquio a bad memory.

BOMBERHEAD: Get right next to him, duck down

and let num have it with your sword.

LEVEL 5-2: Toget through the cliff, jump onto the cliff as high as you can using the wall-climbing technique. Once you've waited for the bird to pass by repeat the technique again and you'll fall onto the platform below.

LEVEL 6-2: Use the jump and slash technique, or if you want to save your points. Nod down on the cross pad white jumping and using your sword.

corner of the screen while placing yourself in the bottom left hand

corner. Now just use your scrolls to send Shredder to the grave. PIZZA: Use the tactic for topping up on scrolls, to give each turtle a full energy bar.

GREMLINS 2

David Killengray from Loughton in Essex sent in loads of codes to try out on this on this decent Nintendo shoot 'em up. According to David, with these codes you get that level's weapon as well, which can't be bad!

FESTER'S QUEST

Peter Lindsay from Glasgow sent in tips for a gobsmacking 24 Nintendo games! We've decided to print a few of them, and one of them is this tip for destroying the alien UFO in this sad excuse for an arcade adventure. Just drink an invisibility potion and then shoot the machine gun on the lower left side. When you have blown that up, move all of the way to the right and bomb the upper right of the computer. Once you've done that, the game is complete!

VALIS III

Good of Ingemar Hjelmstad from Sweden sent in a huge stack of cheats for this game. This one is quite cunning in that it reveals all of the cinematic-type screens to be found in the game, and yes, that does include the ending! On the title screen press buttons A and C and move the D-pad diagonally up and to the LEFT. Press START and you can see any of the screens your heart desires. Also, to access the hidden stage select. hold the D-pad up and hold down the A and C buttons (do all this on the title screen). Press START and when a black screen appears, let go to reveal the hidden menu!

Sampo Sammalisto from way off in Finland sent in a thinly-disguised begging letter along with a few tips. One of his more interesting efforts was this tip for invincibility on this cracking shoot 'em up. For this you need two controllers. Turn the system off and hold down and right on control pad one, along with up and left on control pad two. Now press pad two's button one. Keep all this held down and turn the system on keeping all of that pressed down. When the title screen has been and gone, you can let go and start the game proper, and to quote Sampo himself:

VERYTEX

Pause the game and hold down A, B and C and wiggle the joypad about a bit. Unpause the game and you should be endowed with a shield! This can be repeated as many times as you like - even when your ship is blowing up, if you're quick. Sometimes it also gives you extra lives! Thanks again to Jake Smith from Liverpool!

HELLFIRE

If you're having problems with this superlative shoot 'em up (the best on the Megadrive at the moment), try this tip to get 99 continues! Just go to options and select HARD as your difficulty level. Then go to the sound select and listen to any tune for 70 seconds. The game should start automatically and it should say YEA RIGHT where it normally says DIFFICULTY SETTING. That means the cheat's been installed! Daniel Gibbons sent that in, although he's only tried it out on the American Genesis import version of the game.

GAMEBOY

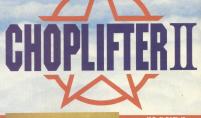

Take a look at the page with the little 76 in the corner and you'll find a review of the latest Gameboy stunna, Choplifter II! Gaz has spent many hours playing this game and is now ready to unleash this mega Choplifter II player's guide! Check it out!

WATCH THE BIRDIE

Your Choplifter-class helicopter isn't the only thing that takes to the skies in the game, so keep a look out for the local wildlife! Hits from birds reduces your energy. Make sure you give any scenery a wide berth too, as if you're clumsy and hit anything on the ground, you'll lose more energy!

NO VACANCIES

CLOUDS AND RAIN

Keep an eye out for the rain clouds in the game. Some clouds can be flown through with ease. and with no lose to the Choplifter's shields. Unfortunately, storm clouds cause more aggro. If you hit one of these on top power, you'll lose control of your ship for a while (until the danger passes), as well as lose some energy. If you're low on energy you're dead. Look out for the lightning clouds. One hit from one of them and it's curtains!

It's extremely unwise to fill up the helicopter with hostages. If you're destroyed you might find hostages a bit hard to come by and you won't be able to complete the mission! Be on the safe side and head for base when you have rescued three or four hostages. Most levels have three or four extra hostages around in case a few die. Unfortunately, the later levels aren't so forgiving as NO extra hostages

are given out!

MISSION IMPOSSIBLE

Obstacles on later levels may seem impassable, but if you're a really skill dude, you'll blast away at the enemy bases. Once they've bitten the dust, icons are revealed which enable you to proceed. For example on level three, hostages are rescued from the deck of a warship. However, you are unable to land. The trick here is to find and collect the R icon. You can now lower a rope for the hostages to climb!

ANOTHER

If you're a complete spaz and STILL can't get anywhere despite this massive, heaving amount of tips, perhaps you should check out this table o' passwords which can cheat you all the way to the end of the game!

86%, the Master System version of Spider-Man is perhaps the best Master System cart we've had the pleasure to play over the last couple of months. If you're having trouble getting far into the game, try out some of these special Spidey tips!

OUTSIDE THE DAILY BUGLE

There's little to do here. Just spin a few webs and find the open window at the top-right of the Bugle building. Now using the B button crawl into the window. Don't stay in one place too long, or the police shoot you. Don't try to beat up the cops either, because they're invulnerable to all forms of Spidev attack!

WAREHOUSE

Couldn't be simpler really. Just progress from the left to the right of the playing area, beating the seven shades out of ALL of the meanies vou chance across. When all of the cons are out of the way, a forklift truck appears to cause a bit of aggro. Fire webs straight at it to immobilise the driver. Use a special Spidev flying kick to damage the driver, but watch out as the truck moves immediately after the hit. Doctor Octopus appears after the truck. Remembering to take a pic. web up the Doc. punch him and then eat the process. Easy!

The Lizard's slime-laden domain is next on Spidey's list. Working from left to right, take out all of the Lizard's mutant henchmen, but watch out for the Lizard's traps at the bottom of the screen. Fall into one of these and all of the henchmen are mysteriously resurrected when you surface. Once the Lizard appears, take a couple of pics for your collection. Now keep moving to avoid Lizzie-baby's clutches. Cause him serious damage by webbing him up and flying kick him. Spidey's webs don't last very long so keep up your web assault right up to your kick. When the Lizard's gone, you'll have to find his key. Web-swing all the way to the right-hand side of the play area and touch the ground. You should fall into a pit where the key is hidden

THE POWER STATION

A very taxing level this one, simply because Spider-Man always seems to be under some kind of electrical attack. Our advice for this level is simple. Keep looking around for small levers set into the wall. Punch the lever and the electrical attack should stop for a while. Now it's up to you to race your way to the next lever and punch that before the electrical bombardment begins again. In between all this action, it's up to you to take out all of your human assailants. Once they've been despatched, the evil Electro appears to give you some basslet

FAMICOM

TIPS

Check out these tips for the Super Famicom game Gundam F91 - a game featuring loads of huge robots and violence! Unfortunately a vast majority of the game doesn't make sense because of the Japanese text. Well, help is at hand in the form of these MEAN MACHINES tips!

IN THE BEGINNING

You start the game with two robots: the A-type and D-type. There is no difference between the two to start with, but after each successful campaign each type is fitted with a new, individual weapon. Later levels provide you with new robots which include the eponymous F91!

Select your robot with the control pad. Press butto A to confirm selection. Press button B to clear the screen. Now just press start!

PICK YOUR TARGET

The main map section provides information as to the location of enemy robots. By moving your robot into contact with an enemy activates the combat section. If you win the combat section you return to the main map to select another target. When all enemy positions are destroyed you proceed to the enext campagin. If after a combat section you are baddy damaged return to the main ship and select your other robot.

To move your robot around the map move the red marker over the robot and press button A. Now move the marker to the desired locale and press button A to complete your move.

GUNDAII 102

KNOW YOUR ENEMY

To complete each campaign you must defeat squadrons of enemy robots that are overfwhelming your defenses. A squadron consists of three to four robots made up from the seven different models available. Identify each robot and destroy the more advanced models first.

WEAPONS ENERGY

This yellow bar represents the remaining energy for engines and weapons. Too many wasted shots drain energy fast. If the bar reaches the bottom you run out of fuel and are left to drift about space forever! Game

SYSTEM

This diagram is used to select weapons for combat. when in attack mode use the control pad to run through weapons available. When you select a weapon (shown in red) press button A to operate.

GUNS AND ROSES

You start the game with three weapons. Each weapon is designed to be effective for a specific range. After a successful range, your robot is fitted with a new weapon.

POWER SWORD

A powerful handheld weapon that causes lots of damage but you must be close to the enemy for any decent effect.

MACHINE GUN

A weapon that's not that deadly, but doesn't use up much energy. Most effective at the top end of the middle section.

LASER CANNON

A devastating weapons that kills with one shot but eats up your energy like there's no tomorrow!

FAMICOM

TIPS

MAIN VIEWING SCREEN

This screen presents the battle to the player. You are able to see whether your attack's are successful or not. You are also able to see your enemy attacking!

RADAR DISPLAY

This display shows the position of enemy units in the vicinity. Using the control pad you maneouver the enemy units (the yellow dots) into the target area (the triangular section. The target area is divided into three sections. These sections represent the most effective areas to using short, middle and long-range weapons. For example, if you plan to use the long range laser canon, an enemy unit must be manoeuvred into the lop section to be effective. Laser canonos are less effective in middle range and pretty hopeless in short range.

LIFE METER

The green bar represents how much damage your robot can take. If the bar reaches the bottom it's game over!

ON THE DEFENSE

Enemy units have a variety of weapons with which to attack. When your radar announces an enemy attack, your viewing screen tells you which weapon you should defend against. Pressing the directional pad in one of four directions enables you to avoid attack.

GG SHINOBI

The best game on the Game Gear? Very probably. It's also got some of the best music you'll hear on the sonically deficient machine, so this sound test might come in handy. On the title screen, press A and B down together along with START and you'll instantly be transported to that groovy muzak menu!

In case you're wondering, a road rash isn't some kind of weirdo disease. It's the marks you get when you silde down the tarmac after coming off a motoroike at over 100 mph! And, as you might imagine, it's quite a painful experience. As you'll find out when you play Road Rash

This motorbike racing pame features live different tracks, and the object on each is very straightforact, beat the other 16 riders to the finishing post. Can't be simpler, en? Well, things are made a little more complex, by the fact that there are no rules - riders can create into or even punch other index in an attempt to knock them off their bikes. So it's a pretty violent high-speed fees for all.

Add to that cars' (Volvos we reckon) who travell the road wing lowards you on the left and in the same direction as you on the right (this is America, don't forget) which can be crashed into all to easily and a highly annoying traffic cop who chases after you and pulls you over for speeding whenever he can, and life suddenly becomes more difficult.

If you manage to finish all five races, you progress to the next level, where cars are more numerous and riders even more maniacal. It's tough out there. But then life as a psychotic rider is never easy...

COMMENT

MEGADRIVE

nat mouse is back! Mickey Mouse, the geriatric Disney rodent returns to our Megadrives in a 16-bit

translation of the classic Fantasia movie! Some evil bleeder has gone and pinched the Master Sorcerer's music while his apprentice (aka

Mickey Mouse) was asleep. Mickey's obviously a tad worried and faces the wrath of the Master Sorcerer if he doesn't retrieve the lost notes. So, using his special magical powers, Mickey whisks himself off into a dream where he does battle with the likes of possessed magic mushrooms, mobile broomsticks and evil toads intent on sealing the cheese nibbler's

Mickey's task is to scour the levels, finding the missing musical notes and escaping before his energy level is worn down to nothing.

Mickey looks a bit depressed, doesn't he?

MASIA

MISSILES

Sorcerer's Apprentice can scoop these up and use their magical powers against the evil sprites that are out to get him. Two types of magical blast are on offer. A small blast only takes up one unit of magical power and dispatches the

weedier enemies, whilst a big blast does away with the larger enemies but is a bit more costly on the magical energy meter

MICKEY'S SKINNY-DIPPING

Fans of the Castle of illusion will remember that in on stage. Mickey swims through a colossal cup of teal A similar stage is evident in Fantasia. A whirlpool guarded by a fairy leads the way to an underwater level, where more energy and bonus points are

COMMENT

To look at, Fantasia seems as good as Mickey Mouse, with excellent sprites and gorgeous backdrops. Indeed, after playing it briefly when it was on display at the CES Show in Chicago, I thought it was a real winner. However, after finally getting the chance to play it properly, I quickly discovered its beauty is only skin deep. The

gameplay is badly flawed and there IAN are several highly annoying features that make the action frustrating. For a start, the collision detection is very tight - Mickey loses energy even when it looks like he's cleared a baddie! The magic controls are very sluggish - you press the fire button and there's a horrible pause before Mickey shoots... and it a baddie is close by or moving towards you fast, you just can't avoid being hit. That might be frustrating, but worse still are the completely unavoidable and very sly hazards the programmers have put into the game. Platforms drop, baddies pop up out of nowhere or change direction without warning, things fly on-screen giving you no chance to avoid them ... aaagh! I like a challenge, but when you're given absolutely no chance and are forced to memorize and anticipate hazards and traps before they happen, playing becomes a chore. The final straw is that the game is absolutely the same every time you play, with things appearing in the same place at the same time. It's all too linear, with no freedom of movement like the previous Mickey game, and the constant routine of doing exactly the same thing game after game after game doesn't take long to get tedious. It just doesn't have that great feeling of exploration, and certainly doesn't have the variety of the original game. If you're a Mickey Mouse fan and like the look of this, make sure you give the game a very thorough playtesting. It might look as good as the original, but it most certainly doesn't play anything like it, and I think that many Mickey fans

An evil menace lurks just around the corner!

NOTES OF MISERY

ickev struts around level 1-2

The object of each level is to find the hidden notes. But be careful, because if you don't find enough notes by the time you reach the end of the level (and that means battling through three sub-levels) you're sent back to the beginning to start again! This is incredibly annoving - so keep an eve out for those notes and don't miss them At the end of the level, to show you how close you got, a scale appears at the top of the screen and fills in the notes you collected

will be very, very disappointed. I know I am.

SPOT THE SPRITES

As you can see from the sprites are taken directly from the classic Disney film! These include

▲ Mickey's left alone in the

Watch out for that enemy sprite, Mickey!

▲ Magic lamps ahoy! COMMENT

Well, I came, I saw and I left the MEAN MACHINES games room a aibbering wreck! Although this effort has excellent graphics, the

gameplay is incredibly

frustrating! I'm talking collision detection that's about as effective as a broken pencil, crippled controls with a sluggish response time and a grotesque lack of decent restart points! The gameplay is just so annoying, I recommend you keep all sharp or pain-inflicting items away from the Megadrive, because after a while you'll be very tempted to make use of them - on either yourself or the cartridge! I cannot stress how wound up Fantasia made me feel after an hour's play - surely games are supposed to relax, or perhaps even entertain? Just forget about Fantasia, for the sake of both your bank balance and your mental health.

Alligators take the Mickey.

Just a few screens to the end of the level!

Arrrrgghhh! Fantasia's many gameplay flaws result in frustration as soon as you start playing!

It's tough - but there are so many annoying features that many will be put off before they

complete the game.

Lovely graphics let down by totally dreadful playability. Even the biggest Mickey fans might be disappointed.

t the tender age of fifteen, Peter Parker was bitter At the tender age of inteen, the tender age of inteen, the him with by a radioactive spider, which endowed him with the proportionate strength and agility of a spider! After being partly responsible for not saving his uncle's life, Peter Parker decided to dedicate his life to fighting crime - as the Amazing Spider-Man!

A few years have passed and the criminals have had enough of having their cunning schemes constantly foiled, and thanks to the Kingpin of Crime. they've hatched a dastardly plot to do away with the web-slinger, and gain control of the city of New York into the bargain!

The Kingpin's planted a massive atomic bomb somewhere in New York and it's going to explode in under 24 hours! What's more, he's managed to convince the good citizens that Spidey's responsible! Spidey's job is simple. Find The Kingpin and disarm the bomb, but Kingpin's recruited some of Spider-Man's worst enemies to put up a bit of a fight.

PHOTOS FOR CASH

Taking pictures of the end-of-level super villains enables Peter Parker to cash in on his powers. Any money made can then be used to top up on web fluid. \$150 are awarded for any good pics of the likes of the Lizard, but watch out for Venom. A bonus \$100 is available for a good pic of him (or rather, it).

ELECTRO

SANDMAN

Sandman is capable of changing himself into sand at will, which makes punching him very difficult indeed. He can also compact his mass, which makes his massive lists very hard (as well as very dangeous indeed). Sandman's hanging out in Central Park at the moment, and Spidey's death is high on his agendal.

ur hero. Max Maverick, has a few problems. As well as severe body odour, bad breath and the urge to spin rather unconvincing yarns (that's why he's isolated, see), his little world is in the process of being taken over by evil, slimy creatures that are somehow even more grotesque, smelly and unappealing than

Max realises that the path back to social acceptability involves ridding the planet of the alien masses, and this generally involves travelling up the pseudo-3D landscape blasting all and sundry with a variety of weapons. Only when this done can Max have a bath, gurgle some mouth wash and reioin his circle of friends.

But Max isn't so good at the heroics of seeing off an alien invasion task force, and he's going to need your joypad alien-blasting skills!

The authorities of the planet Arth look on with slight bewilderment as the universe is slowly rid of countless civilisations. And then the Arth's sun begins to collapse, and Arth itself faces devastation because of deadly solar flares. Being a scientific genius, shooting ace, mining authority and best pilot in the cosmos. you're one of many who've been drafted in to find a solution to the problem, or failing that, find some new planets to colonise

Unfortunately, the Arth authorities aren't making things easy for you. You have to earn a living in order to upgrade your ship to face the challenges ahead. and the only way to do that is to mine some of the planets and sell the goods to the economic community. Understandably, some civilisations don't particularly fancy the idea of a colossal ship landing on their planet and robbing them of all the valuable minerale

Just to make sure that you're aware of how dire the situation is becoming, the Arth authorities have added a sensor to your ship that tells you how many days are remaining until Arth becomes a distant memory!

So it's down to you and your galaxy-class star ship to seek out strange new worlds and civilisations, and as the saying goes: "to boldly go where no man has gone before!" SHIELD

It's all-out war across the globe, and things are looking grim for the goodies. The baddies have pinched the most valuable personnel in the goodies side, and some one has to travel behind enemy lines to rescue them. In case you hadn't guessed, that happens to be you. In order to aid your efforts, you've been given a highly advanced Choplifter chopper. This particular piece of hi-tech machinery carries the latest in cannon technology, with armour-piercing shells hat can annihilate just about anything you're likely to face on your dangerous mission. It also has seating for plenty of passengers, which is ideal when it comes to actually rescuing people

The action is displayed on a multi-directionally scrolling landscape. The object is to find a certain number of people per level and return them to base. This simply involves blasting enemy hardware and landing, thus enabling the prisoners to reach your gunship. Then it's back to base to off-load your cargo. This task doesn't change between the levels, but the sectors the Choplifter infiltrates become steadily more dangerous.

COMMENT

Choplifter is a perfect mini blastathon which packs thrills and spills in a totally addictive package that's impossible to resist. Put it at JULIAN the top of your shopping list.

CHOPLIFTER II

CHOPLIFTER ORIGINS

Choolifter is an ancient game concept, dating back to 1983 when it was first released on the C64 and 8-bit Atari. However, Sega saw what a great game concept Choplifter was, and converted it into a coin-op, which was much the same but with superior graphics and sound. A Master System version of Choplifter is also available. converted from the coin-op!

Take a time warp back to ancient Greece, if you will till was a time when men were men (even if they diwar grille leather skirts), women were women (and always did the house work when they weren t getting kidnapped) and many-headed monsters and the undead were a common hazard on the drit track to

COMMEN

IN THE HOUSE OF GOD

The first job the player has is to find out more about his quest from the god of gods. Zeus himself! He's found simply by going right from the start location to a white louse. Go through this and walk eft and you'll be right next to Zeus' palace. Unfortunately, before you can hear his words of enlightenment, you must take on a

psychotic bull that's positioned itself in front of the temple!

This looks pretty similar to the likes of Zelda and Faxanadu, and o be honest, if this kind o' thing is your cup of tea you'll probably find a massive and enjoyable task ahead of you. Unfortunately, there are a couple of things that didn't really appeal to me. First of all, the simplistic interaction with the other one-speech tape-recorder-like characters is a bit annoying.

Another thing which hampered my enjoyment of this game somewhat was the pretty boring action sequences. Just running along a horizontally-scrolling landscape slashing your chopper at small enemy sprites isn't my idea of an excursion to Excitement Central, Zelda fans should have a look at this. Others will probably find it a bit of a bore no matter how much there is in it.

TALK TO ME!

As the hero progresses through Ancient Greece, the chances are that he'll meet some local peasants on the way. Conversation however, is quite limited. The only way to evoke any kind of response out of them is to push UP and button B on the joypad, whereupon they say their piece. You can't say anything back, however, and the characters always say the same thing!

I'n the god Zeus.

GRECIAN 2000 BC

Ancient Greece is a pretty vast place, as you can tell by the map pictured here. Each of the indicated cities is a place that our hero visits during the game. In order to complete some mini-quests, going back to previous levels is also necessary.

SUB-SCREEN ANTICS

FAUL. FITTH HOW HIGH

ressing START takes the player of a sub-screen where various ems and weapons are selected for use Items included in the ame are the likes of clubs, harps, talfs, shields, crystals, bracelets

COMMENT

Battle of Olympus is a good example of the Faxanadu/Zelda Il-type game, but doesn't have enough new or interesting ideas to appeal to players who dor! normally play something like this. The speech/interaction is a good idea, but unfortunately it's very limited and becomes completely predictable once you've played the

JULIANgame a few times. Another negative point is that the action is a bit tedious - the hero has only one attack move, and the baddle spriles aren't particularly exciting. Adventure/RPG fans will certainly enjoy this, but if it's fast action

and thrills you're after, look elsewhere.

MEGADRIVE REVIEW Revi

I any more. Mr Big and his violence-crazed minions have moved into the city, and their main occupations include the scaring people with their grotesque features, beating them up with a variety of weapons and generally causing a bit of aggro.

The police are busy setting up road traps on the motorways and making Crimestoppers commercials, and the carnage on the streets continues unchecked! Sick of the way the people are being treated, three heroes decide to leave the police force and become street vigilantes, kicking the excrement of anyone who looks vaguely threatening.

Their one objective is to put an end to Mr Big's reign of terror, by taking out the man himself who waits at the end of eight levels' worth of beat 'em up action. It's a hard task, but our heroes aren't just hard hear't blinke reself.

Adam Hunter exercises his fists of fury on the hapless enemy sprites.

Dotted around the play area are various tasty morsels. These are eaten to provide players with extra energy. Food available includes the likes of apples and large ready-roasted chicken.

MEGADRIVE

COMMENT

Streets of Rage is THE beat cm up for Megadrive owners to buy. The action is great especially with two players on-screen at once! For once, the players act as a team, using each other to produce moves not available in one-player mode. The graphics are great. The sprites are excellent, and at time the screen is chock-a-block with thugs ready to send you to your doom! The backdrops are similarly up. The screen is chock a-block with thugs ready to send you to your doom! The backdrops are similarly up. The screen is chock a-block with the sceen you are here.

detailed, although the scenery on each level could've done with being a bit more varied. My one substantial gripe is the fact that the game is doesn't present much of a challenge on EASY mode. Gary and I completed the game in two-player without using one continue! However, put the difficulty level on HARD and the action is made all the more enjoyable and challenging. Beat 'em up fans should check this out as soon as it hits the streets.

A quick knee in the face courtesy of Blazel

Blaze is a whiz at flying

ESWAT EXCITEMEN

Should the going get really tough, each player has the ability to summon the ESWAT Cyber-Police. They drive up in their flashy motor, produce some heavy artillery and blast the living daylights out of the opposition. In one-player mode, they always use a large bazooka. In two-player mode, the other player can summon a massive scatter bomb bombardment! The ESWAT connection extends to some of the enemy sprites, blatantly blagged from the coin-op!

Plenty of decent attract screens make the game look special.

Loadsa sprites on-screen at once, with some decent animation and good enough backdrops.

Techno-dance tracks for each level, and they're some of the best Megadrive tunes ever heard!

Fist action the likes of which Megadrive owners have never had before!

Pretty easy on easy level, but the going gets tougher when you knock that difficulty level up a few notches.

The greatest and most enjoyable beat 'em up yet seen on the Megadrive!

lying around Western Furone doesn't sound very dangerous, but when you've been warped back into history and it's the 1940s, you'll probably find that a few thousand Germans are out to turn your fighter bomber into flaming wreckage.

Like the fool you are, you "volunteered" to take part in several missions instrumental to Allied victory in the Second World War. You still hear the voice of your CO. Colonel Stratford, ringing in your ears, "You have volunteered," he said gruffly, "to take on a flying mission that, until now, you knew nothing about. That, my friend, is the kind of selfless bravery that makes great pilots.

It's also the kind of selfless bravery that keeps the likes of Colonel Stratford several hundred miles away

Now it's just you and your Hobson FB-61 "Grim Reaper" fighter bomber. The four missions are pretty simple. Just destroy some munitions trains travelling through Munich, a bunch of namby pamby V-1 "Buzz Bombs' darkening the skies of southern Paris, JU-88 bombers to the east or the U-Boats hanging out in the North Atlantic

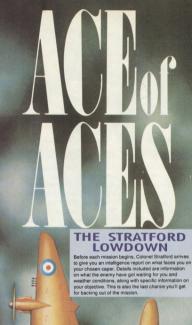

Simple eh? Just remember that the Luftwaffe don't take kindly to our Tommy heroes infiltrating their airspace.

Oo-off A light sim on the Sepa.
How interesting, Well, it would be it was any good, but unfortunately Acc of Aces is a sad shambling party of a light sim. It's nothing to do with the depth of the wind and the same of the s

battle it's very fiddly and serves just to annoy. The sound is laughable, with a single-note engine and simple shooting noise effects. Even if you're incredibly desperate for a flight sim for the Sega, avoid this seriously lacking game at all costs!

Button B combined with down on the joypad takes the player to the bomb bay screen. Here the bay doors can be opened and the target can be bombed. This is also the place to change the main weapon between the main guns and rockets.

PORT AND STARBOARD

During the game, different instruments can be viewed and used by switching between views. The B button combined with a direction gives the player a different view of the proceedings. Changing the engine speed. lowering the landing gear and adjusting the flaps are just some of the options open when you've chosen another view. Actually piloting the 'plane can only be

done on the front view screen

STORY

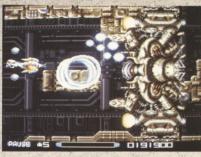

After the stuffing they received in the original Ra-Type, the Bydo Empire have regrouped and are growing like a letseting ocsmic burnour of vasts proportions. Once again, they're spreading their own reign of terror and destruction through the cosmos, and their tear-inducing antics are going unchecked!

Enter the Alliance, who reformed at the first sign of Bydo-type trouble. They've dusted off one of their old R-9 attack lighters and kitted it out with a whole load of extras from the showroom that make it a far more fearsome ship than the first.

Now all they need is a pilot, and it will come as no surprise that you've been volunteered to take the new ship straight into Bydo territory. Your mission is simple. Destroy the Empire, or the universe will suffer the consequences...

HEAT-SEEKING MISSILE: A lot more useful than the air-to-ground model, this fires two rockets which home in on their prev.

THE FORCE

Shooting one of the POW Armour carriers releases a nower-up that provides the R.9 with The Force The Force is a detachable shield which fastens itself either to the front or rear of the R-9, protecting it from low-power enemy fire. It also carries it's own special lasers that replace the R-9's relatively feeble firepower. A quick stab of the Famicom's button A (or the R key) propels The Force deep into space, where it destroys enemy fighters on contact.

BIT: Two of these can be collected, and help defend the top and bottom of the R-9 from enemy fire. The Bit is also useful for ramming targets

COMMENT

Darius Twin was okav as far as shoot 'em ups went, but Super R-Type just blows it into deep space! It's a close

conversion of the coin-op R-Type 2, except that an extra level has been bolted on - and at

no extra cost! R-Type has always had some kind of magic about it that sets it apart from the swollen masses of horizontally scrolling shoot 'em ups and I'm glad to say that the Super Famicom version retains that special magic quality that made the original compelling and playable to the extreme! The graphics and sound are truly excellent. The backdrops and sprites are all graphical masterpieces, and the stereo sound effects and music really enhance the atmosphere. Super R-Type is an exceptional

cartridge that MUST find its way into your Famicom collection.

Without The Force attached to the R-9, the main offensive firepower comes from the front-mounted laser cannon. This cannon is okay for general day-to-day Bydo annihilation, but when it comes to dealing with the bosses, something meatier is required. Holding down the B button powers up the special weapon. The longer you keep your button depressed, the more powerful your shot. Once the meter reaches peak power, the second, even more powerful weapon is powered up ready for use!

FAMICOM

This boss is on the run! He flies through the landscape at breakneck speed and the R-9 follows, dodning enemy fire and scenery! Firing at its heart is the only way to see this guy off.

This hi-tech level poses a new problem to the hardened R-9 pilot: some of the walls actually move around, trapping and perhaps trashing the ship!

The trash disposal complex is the R-9's next port-of-call Conveyor helts carry the trash to the furnaces, but it also has a tendency to fall onto the R-91

A massive Bydo battleship is poised to strike at a key alliance hideout. The R-9 is called in to singe-handedly destroy this vast laser-spewing cruiser!

Twin indestructible snakes combine to distract the R-9 from the serious business of blasting away at the central Bydo structure. Shoot it in the evel

A small satellite causes the R-9's first end-of-level problem. This guy releases mines that the R-9 either avoids or shoots. One good super-weapon blast is all that's required to see this guy off.

COMMENT

This is the Super Famicom shoot em up I've been waiting for, and I'm glad to say that it's excellent! The graphics are marvellous, with highly detailed sprites and gorgeous backdrops, and the

music is amazing. Gameplay? Well, it's fairly easy on the easy level, AN but normal and hard levels are very tough, and experienced blasting fans will certainly get their money's worth. The only slightly disappointing aspect is that the action

occasionally slows down when things get very busy on-screen. But it doesn't really intrude on the action and it also happens on the original coin-op, so I suppose there's nothing to really moan about. With its new features and addictive playability that sets down a tough challenge, Super R-Type is a nust for your Super Famico

A brilliant animated opening sequence is the icing on the cake. Loads of options and a sound test to check out as well.

Truly brilliant sprites and plenty of varied backdrops to constantly amaze the eye!

Tremendous stereophonic soundtracks and explosive sound effects.

Arcade R-Type has a special quality all of its

own, and it's in the conversion in vast quantities!

Very easy on KIDS level, but the harder skill settings make this a very tough nut to crack.

The greatest blast ever to grace a home console. Go get it before it sells out!

NINTENDO

's soccer action all the way for you NES owners First of all you had Nintendo World Cup (hot contender for the worst console soccer game of all time), this time you've got Jaleco's Goal! Whereas World Cup was a more conventional horizontally scrolling footy game, Goall is a tad different in that the action is displayed in Zaxxon-style isometric 3D.

Usual soccer rules apply, although the gameolay is altered slightly by use of the massive amount of options available. As well as one or two-player games. there's the option to play a single game or participate in the World Cup (where you're up against 16 of the best teams in the world!). Also available is the opportunity to play a Pro Tournament game where world famous soccer teams like Kansas, Chicago. Dallas and Boston battle it out for supremacy!

SOCCER SHOOT-OUT

One of the more bizarre features in Goal! is the option to play a shooting contest, where one player must take on two defenders and score past the goalie. Like the main game, one or two players can have a shot at this, with one player adopting the role of the attacking player, while the other controls the defender and 'keeper

World Cup is put into a group. There are four groups, A. B. C. and (unsurprisingly) D. Each team plays everyone else in their group once. The two teams in each group who prove their worth are put through the second round. All of these teams play each other and the four teams that come out best go through to the semi finals. From then on the two winners of the semis go on into the final in a one match battle for soccer supremacy!

SOCCER STATS

Jaleco describe Goal! as "an extremely realistic one or two-player soccer game" and they pride their game on the many attributes given to every player on the field. Each player performs according to criteria such as dribbling, kicking power, running speed, tackling.

CONTROLLING YOUR BALLS

much of a problem. The B button passes the ball whilst button A is used to attempt a shot. Hooking and slicing the ball (known as aftertouch) after you've kicked it is also possible just by pressing button B again and pressing the direction you want to hook or slice the ball. Back-spinning and extending shots are also possible.

PREVIEWCALIFORNIA

Duuuuude! Can't afford the tickets to Californ-Eye-Aye? Well, take heart with this new Nintendo game from MB Games, California Games takes you to the sunny West Coast and lets you

engage in a variety of wild 'n' wacky sports, including surfing, rollerskating, BMX-ing, hackey sacking, skateboarding and frisbeeing. The original computer versions of this off-beat sports simulation were excellent - let's hope this Nintendo version is the same.

Are you anarly enough for the BMX?

Very much in the Boulderdash mould is Digger T Rock from MB Games

Programmed by Rare, it casts you as an adventurous miner who's exploring a series of hazard-packed mines in the hope that he'll discover untold riches. He does... but they're guarded by an army of nasty creatures who want to sink their fangs into Digger's juicy bot. Featuring brilliant music and highly addictive. challenging gameplay, Digger T Rock looks like it'll be a sure-fire winner when it's released at the end of this year. Expect reviews around that time too!

GALAXY

One or two players can participate in this intergalactic race game. Viewed from a remote third-person angle, the object is to race another three rockets around a cosmic race track and use fair

means or foul to be the first past the finishing post. There are a variety of different craft to use, and there are also extra weapons to pick up to make your opponent's lives miserable! Jazza recently had a quick go on the game and says its a great laugh, especially with two players. Keep an eye out for it when it's

Zooming at top speed around the track.

Activision's Sword Master casts you as a big 'n' beefy hero on his way to kick the seven shades of stink out of an army of swords 'n' sorcery monsters. From what we've seen, the action is looking pretty darn tasty - we'll let you know more about it when we get the game in for review in late

Atari's cult two-player arcade game is soon to hit the Nintendo courtesy of MB Games. It's a superb conversion (no surprise once you find out that the brilliant Rare team are behind it), and packs all the features of the coin-op original, with six levels of marble-rolling mayhem squeezed into the cartridge. The gameplay is superb, and it's become a

CD-ROM console which will blow the likes of Commodore's feeble CD-TV completely out of the water The 32-bit rumour came from the fact that both the Megadrive's

JAZZA COMES IN TWO DELICIOUS FLAVOURS

When our esteemed editor Jazza recently returned to his home town of Aberystwyth for a long weekend, in the weather was so warm that he decided to buy an ice lolly. Imagine his surprise when he went into Aberystwyth's top ice

Iolly shop (the Rock Shop) and discovered Jazza ice Iollies Iurking in the fridge! There are two flavours, raspberry and orange, and Jaz reckons raspberry is tops! Whatever next? Rich chocolates? Oz fish fingers?

and the Mega-CD's 16-bit processors work in tandem to process information at incredible speeds. And while the CD is being accessed, one processor can still function to keep the action going on-screen! The new custom graphics chips apparently have extra hardware playfields and allow spite scaling. If that's true, the Mega-CD will be able to match the Super Familton for

performancel

The Mega-CD is released in Japan in October and will cost around £250.00 - it's expected that importers will charge around £350.00 for the machine.

If you're after an Official UK Mega-CD, you'll have to wait until later on next year before they're available in high street shops!
